Hair
Skin
Nails

Cartilage
Bones
Joints

Skeletal muscles
Tendons

Brain
Spinal cord
eripheral
erves

Pituitary gland
Thyroid gland
Pancreas
Adrenal glands
Testes
Ovaries

Heart
Blood vessels

Integumentary System

- Encloses internal body structures
- Site of many sensory receptors

Skeletal System

- Supports the body
- Enables movement (with muscular system)

Muscular System

- Enables movement (with skeletal system)
- Helps maintain body temperature

Nervous System

- Detects and processes sensory information
- Activates bodily responses

Endocrine System

- Secretes hormones
- Regulates bodily processes

Cardiovascular System

- Delivers oxygen and nutrients to tissues
- Equalizes temperature in the body
