

### Tri 3--Identity

#### Culminating Activity

#### Mask Making

After studying about your family's history in Humanities and your own DNA and heredity in science and your personal self in Language Arts we want you to design and create a mask reflects your identity now. Please use creativity and take your time to portray to us your identity as you know it now. Think about all you have learned about your roots and your personal genetics and your interests. You can use the space on this page to begin brainstorming ideas for your mask and even drawing them if you would like. We are excited to see what you create!
