Earth Awareness Lesson Plan: What's Your Cause?

Adapted from: <https://educators.brainpop.com/lesson-plan/earth-awareness-lesson-plan-whats-cause/>

Students will:

1. Understand the subject content of their chosen research topic
2. Use technology resources for solving problems and making informed decisions
3. Use a choice method to communicate information and ideas effectively

Instructions:

1. Invite students to choose a topic they would like to learn more about (air pollution, energy, global warming, humans and the environment, population growth, recycling, or water supply).
2. After gathering the needed information, students should create product for presentation.
Necessary parts: TITLE, TOP 5 REASONS WHY AWARENESS FOR THEIR TOPIC IS IMPORTANT, CONCLUSION.
3. After completing the product, students may present their findings to their classmates or other classes/community members. This should fill no more than 8-10 minutes.
