

Tragedy of the Common Goldfish

Fishing: You may only touch the straw and must suck(inhale) to “pick-up” your fish. It must make it back to your boat without falling to the table to be a “catch.” A fallen fish is “bycatch” -waste, that no one can have.

- Each year/season lasts 1 minute
- You may catch up to 4 fish
- At the end of each round you may eat your catch, but be sure to record your data on the table first.
