

To culminate your hard work on Bridge to Curriculum and the Montessori elementary environment, you have a choice of activities.

**Either:**

Create a word cloud of Montessori elementary terms.

Choose 7-10 terms that you feel capture the essence of a Montessori elementary classroom. You may use the following [link](#)

[\(Links to an external site.\)](#)

to create your word cloud, or use a program of your own choosing. There are many options out there, or maybe you'd like to work by hand.

**Please upload your final design.**

**Or:**

Create a draft of a lesson plan that uses Montessori material. It could be one that you have seen here in Bridge, or it could be one you are familiar with from your own experience. Try to either use the lesson directly, or to adapt it to specific needs in your classroom. For example, if you choose to use one of the Great Lessons, your follow-up work would look very different for secondary than it does for elementary.

**Please upload your draft.**
